7 次の英文を読み、あとの問いに答えなさい。

These days, saving our nature and earth is a big matter for us. There are many kinds of global environmental problems such as global warming, climate change, and so on. We need to think about the way to solve these problems. Especially, the plastic garbage is a big problem. We often use plastic shopping bags or plastic bottles, but we also sometimes see these things damage the ocean. We have to think about this problem.

What is the problem of using plastic products? When we make plastic, we use oil, and also when burning plastic, it makes carbon dioxide (CO₂). ① This process may lead to global warming.

We have a lot of garbage of plastic bottles or plastic bags. It is so convenient for us to have and use these plastic products. However, they can damage our environment. Some people throw away plastic garbage *illegally. Such garbage goes into the ocean and pollutes it. We should change our lifestyle for the earth. Reducing the amount of plastic garbage is important. In 2020, Japan started ② a policy for that.

Since July 1st, 2020, plastic bags are not free any more. We need to pay some money if we want them. The United States and some European countries have already started this policy, and they've reduced the plastic garbage. We can expect the same change in Japan. Let's have a look at changes in some prefectures.

Tokushima prefecture started charging for plastic bags in 2019. They could reduce 70 million plastic bags and 700 tons of plastic garbage in a year. This change shows that when we try not to use plastic bags, we can make a difference. We should finish using plastic bags, and bring our own shopping bags when we go shopping. In Toyama prefecture, people have to pay for plastic shopping bags from 2008. The prefecture has continued doing this for more than 10 years. Research in 2017 showed 95 percent of people in Toyama started using their own shopping bags. And now all prefectures started this policy. Japan should be a good model to reduce the plastic garbage in the world.

Changing our life style is sometimes difficult, but we must change our way of thinking. Our nature and earth is in danger. It's time to think more about changing our life style, and save the earth.
